Subject: Regarding NEXT revisions on train facilities along the river

[Some people who received this message don't often get email from 72rover@gmail.com. Learn why this is important at <https://aka.ms/LearnAboutSenderIdentification>]

I fear the consequences of what NEXT and others motivated by similar values will do, have done, to our rural and vulnerable communities. We won't be the first or the last to be run over and ruined by the forces of grab, destroy and walk away. The trains, on old tracks by the river, in jello soils, are an inevitable disaster, and easy conclusion to draw, given the circumstances and recent history of train failures around the country due to inadequate inspections, and safety lacking priority. Reject NEXT and others who would impact our entire county with trains on old tracks, disrupting traffic with mile long trains, carrying explosive and toxic materials along our river.

Mary Duvall, MA, MSW
