RE : Holce Trailhead Easements

Commissioners,

As part of the construction project at Holce trailhead we have had to modify the easement by moving the boundary 15 ft to not interfere with the City of Vernonia's right of way. In addition, we extended the temporary construction easement to December 31, 2025 to complete the trailhead improvements.

The City of Vernonia has signed off on these modifications to the permit application and we have our public hearing on April 7th. The grant is currently extended through September 30, 2025 with the possibility of extending it to the end of the year if needed in order to complete the project.

We are asking for Commissioner approval of the attached Temporary Construction Easement and Easement agreement by and between Columbia County and Holce Logging Co, Inc.

Thank you.

Melissa Enright
