I am reaching out to stand for our vital farms. I am asking you to stand for them as well. They are far more important to our county than a diesel plant. There will always be jobs here as there are plenty of mills and other businesses but there won't always be farms if you allow this to happen. How would you feel if this were to be in The Gorge? Or maybe along the coast? And take away your livelihood and your family's years of hard work and legacy? Please stand up for these highly valuable people and their huge contributions to our community. Thank you, Janis Saylor, a proud resident of Columbia County
