Subject: RE: NEXT - DEQ LUCS update

Robin:

I spoke with my client and he has authorized me to extend the 150-day deadline for NEXT Renewables by another month to March 23, 2022 to allow us time to prepare and adopt the findings. Hopefully you can find space in the Board's agenda around that time, but if not, let me know and we can work out a different date.

I think this should suffice for purposes of ORS 215.427, but if not, let me know and we can provide you an official letter.

Have a good weekend,

Garrett
