Subject: Opposition to NEXT renewables projects

Hello. Well and steady wishes during these continued challenging times.

In advance of tomorrow's public hearing, I would like to voice my opposition to NEXT renewables projects in Columbia County, both the rail spur and refinery.

The project is inconsistent and incompatible with current land use and the natural environment. The area is currently in symbiotic use with farming, residence, natural habitat and the Beaver Drainage District.

There are plenty of already industrial use sites available for such activities. Also, the integrity of the company is in obvious question.

At this fragile time in our economy and environment, the focus MUST be on maintaining human, natural, air and water health and safety.

I am a registered and dedicated voter. Please stop this project in this location immediately.

As a point person for the voice of many, thank you for honoring current and compatible use of these lands and waterways.

Sincerely ~ Jill M Ciolli
