To: Jacyn Normine <Jacyn.Normine@columbiacountyor.gov>

I would like to know more about how the wetlands are considered "not significant" per DSL guidelines.

It's 2022, climate change is upon us. Flooding along the Columbia will only get more extreme in the next decades. Every scrap of wetland humans have not destroyed is significant.

I believe that the applicant needs to speak more specifically to the riparian and wetlands areas that would inevitably be affected by the rail spur.

Thank you,

Quinn Rivenburgh
