To: Jacyn Normine <Jacyn.Normine@columbiacountyor.gov>

I am writing in opposition to the NEXT Renewable project. Citizens in the surrounding area worked diligently to defeat the coal export terminal and the methanol plant along the Columbia River. Those two actions should be enough to let you understand that another pollution producing project is not wanted and should not be even considered.

This NEXT Renewable project will increase air pollution, threaten water quality, fish habitat, and will destroy wetlands and agriculture land.
