To: Jacyn Normine <Jacyn.Normine@columbiacountyor.gov>

Its perfectly clear to all of us residents in the dikelands that none of the people involved or in favor of the daliance with NEXT or any of its constituents care one iota about any of US. So I'll skip the whole people and farms and environment and so on and get to the point of humanity. What do we know? Well you all know who we are and where we live. Also you have no issue with deflating our property values by subjecting our water table and air quality to poisons. Most importantly you have no concern for the health or well being of any of us, our friends, and our families.

Now lets flip the script. Imagine a determined group of people that know who you are and where you live. Next consider the fact that they care not if you are financially devistated by their actions. And finally face the reality that they have absolutely no compunction about putting the health and well being about you, your friends, and your family at serious risk? Think about it! What would you do? Anyone who possesses any amount of conscience or wisdom would agree that siding with NEXT is not only frot with errant responsibilities but more importantly fitted with dire consequences.
