

JOHN GUMM BUILDING PROJECT UPDATE

Columbia County, OR

FRAMING AND STRUCTURAL TAKING SHAPE!

We are rocking and rolling at John Gumm! Over the last month, we have finished demolition and started framing up new walls. The spaces are really starting to take shape, with the new floor plan now visible. We have started receiving equipment and are actively roughing in electrical pathways.

Finally, we have re-designed and installed a new retaining wall on the east side of the building that will provide support for many years to come.

WHAT'S NEXT

Mechanical ductwork and underground plumbing will begin soon. We are prepping the area around where the elevator will be installed next year. We will continue with framing and start installing fire sprinkler systems throughout the building.
