

# JOHN GUMM BUILDING PROJECT UPDATE

## Columbia County, OR

### FRAMING AND ROUGH IN GALORE!

Over the last month, we have finished up most of the new wall framing. Mechanical ductwork, fire sprinklers, and plumbing rough in has also taken place, and we are framed in for the elevator slated to be installed next year. We have backfilled the retaining wall and are excited to have received the heating units for the building!

### WHAT'S NEXT

We will continue to finish up the mechanical, electrical, fire sprinkler, and plumbing rough ins and running pathways throughout the building for electrical and IT. Drywall will continue to be hung, with walls finished.

*Level 2 Framing at County Counsel 202*

*Basement HVAC and Fire Sprinkler Rough-in*

*Elevator Shaft Framing*

*Retaining Wall Backfill*
