

JOHN GUMM BUILDING PROJECT UPDATE

Columbia County, OR

MARCH UPDATE

We are installing doors and frames in the basement and 1st floor, drywalling in the auditorium on 1st floor, and painting on the 2nd floor. We have hit another huge milestone with the delivery of the final electrical gear for the building. This is a crucial part to the project and an exciting one to check off. As we continue with building finishes, we are looking forward to our elevator install in the next couple months.

WHAT'S NEXT

Next, we will continue prepping for flooring on the 1st floor and 2nd floor and begin window restoration throughout the building.

Level 2 Painting
